Critical Intelligence Problems Committee

Weekly Activities and Status Report - 30 March 1983CIPC Organizational Activities

● We have received indications that DEA will formally request membership on the Committee with attendance on an as-required basis.

25X1

● Also, the Marine Corps will be requesting membership. Reportedly, the CIPC was discussed at a recent gathering of senior military officials at [redacted] resulting in the Marine Corps' anticipation that the Committee will be addressing issues that directly affect them and they are anxious to serve.

25X1

● LCDR Gail Gamprrie, Central Command (CENTCOM) J-2, MacDill AFB, Tampa, called on 28 April inquiring about the CIPC--its mission, functions, membership, etc. She was particularly curious if Unified and Specified Commands were represented. LCDR Gamprrie reported that CENTCOM J-2 was developing a concept calling for a Third World Production Facility. She stated that the concept was in its infancy but they were attempting to ascertain who is producing what, in what format and what frequency. LCDR Gamprrie reported that if the CENTCOM concept materialized they would be producing all-source, Third World finished intelligence for a wide range of consumers--not just CENTCOM. The essence of LCDR Gamprrie's call was that she and CENTCOM are attempting to determine what national level organization and/or committee they should approach to sponsor and promulgate their concept once it is finalized. The conversation was concluded with an understanding that our respective organizations would get together some time in April, either in Washington or Tampa.

● The next monthly meeting is still scheduled for 1430, 18 April; at present it appears that all principals will be in attendance.
